The Great Beanie Baby Bubble Zac Bissonnette 2016-03-15 "There has never been a craze like Beanie Babies. The \$5 beanbag animals with names like Seaweed the Otter and Gigi the Poodle drove a large swath of America into a greed-fueled frenzy as they chased the rarest Beanie Babies, whose values escalated weekly in the late 1990s. Just as strange as the mass hysteria was the man behind it. Sometimes called the "Steve Jobs of plush" by his employees, he obsessed over every detail of every animal his company ever released. He had no marketing budget and no connections, but he had something more valuable – an intuitive grasp of human psychology that would make him the richest man in the history of toys. The Great Beanie Baby Bubble is a classic American story of people winning and losing vast fortunes chasing what one dealer remembers as "the most spectacular dream ever sold."--Back cover.

The Manchurian Candidate Richard Condon 2013-11-25 The classic thriller about a hostile foreign power infiltrating American politics: “Brilliant . . . wild and exhilarating.” —The New Yorker A war hero and the recipient of the Congressional Medal of Honor, Sgt. The Fortunes of Francis Barber Michael Bundock 2015-03-01 This compelling book chronicles a young boy’s journey from the horrors of Jamaican slavery to the heart of London’s literary world, and reveals the unlikely friendship that changed his life. Francis Barber, born in Jamaica, was brought to London by his owner in 1750 and became a servant in the household of the renowned Dr. Samuel Johnson. Although Barber left London for a time and served in the British navy during the Seven Years’ War, he later returned to Johnson’s employ. A fascinating reversal took place in the relationship between the two men as Johnson’s health declined and the older man came to rely more and more upon his now educated and devoted companion. When Johnson died he left the bulk of his estate to Barber, a generous (and at the time scandalous) legacy, and a testament to the depth of their friendship. There were thousands of black Britons in the eighteenth century, but few accounts of their lives exist. In uncovering Francis Barber’s story, this book not only provides insights into his life and Samuel Johnson’s but also opens a window onto London when slaves had yet to win their freedom.

The Daily Show (The Book) Chris Smith 2016-11-22 NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, The Daily Show with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today’s most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show’s behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers—including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell – plus some of The Daily Show’s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show’s highlights, from its origins as Comedy Central’s underdog late-night program to Trevor Noah’s succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics—a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O’Reilly and Fox, and provocative takes on Wall Street and racism, The Daily Show has been a cultural touchstone. Now, for the first time, the people behind the show’s seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America’s most groundbreaking shows.

He describes early Greek and Chinese automotons and discusses ideas of previous centuries and of individuals on this subject.

The Vacuum Cleaner Carroll Gantz 2012-09-26 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early

manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Laboratory Techniques in Thrombosis – A Manual J. Jespersen 2000-06-30 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures. This completely revised new edition combines the strengths of the first edition with new and useful features. Laboratory Techniques in Thrombosis – a Manual still gives detailed descriptions of the recommended assays and their alternatives. However, the manual now has a broader scope because it is no longer limited by the frontiers of ECAT. Experts all over the world have contributed to this edition. Furthermore, new assays have been introduced, improvements have been suggested for other assays, while a few others have become redundant or no longer available. The list of manufacturers is fully updated and a list of the recommended nomenclature of quantities in thrombosis and haemostasis is new to this edition, further facilitating the use of this manual. Laboratory Techniques in Thrombosis – a Manual will contribute to furthering the much needed harmonization

and standardization of tests within the field and should have a place in all working haemostasis laboratories.

Jack the Ripper & the London Press L. Perry Curtis 2001-11-01 “Breaks new ground in its examination of the role of newspaper reporting during the police hunt for the first notorious serial killer.”—Reviews in History Press coverage of the 1888 mutilation murders attributed to Jack the Ripper was of necessity filled with gaps and silences, for the killer remained unknown and Victorian journalists had little experience reporting serial murders and sex crimes. This engrossing book examines how fourteen London newspapers—dailies and weeklies, highbrow and lowbrow—presented the Ripper news, in the process revealing much about the social, political, and sexual anxieties of late Victorian Britain and the role of journalists in reinforcing social norms. L. Perry Curtis surveys the mass newspaper culture of the era, delving into the nature of sensationalism and the conventions of domestic murder news. Analyzing the fourteen newspapers—two of which emanated from the East End, where the murders took place—he shows how journalists played on the fears of readers about law and order by dwelling on lethal violence rather than sex, offering gruesome details about knife injuries but often withholding some of the more intimate details of the pelvic mutilations. He also considers how the Ripper news affected public perceptions of social conditions in Whitechapel. “The apparently motiveless violence of the Whitechapel killings denied journalists a structure, and it is the resulting creativity in news reporting that L. Perry Curtis Jr describes. His impressive book makes a genuine contribution to 19th-century history in a way that books addressing the banal question of the identity of the Ripper do not.”—The Guardian
