Anthropology Newsletter 1990

Ethics and the Profession of Anthropology Carolyn Fluehr-Lobban 2003 This revised second edition of *Ethics and the Profession of Anthropology* renews the challenge to anthropologists to engage in a dialogue concerning their commitment to professional ethical conduct. Containing a majority of new chapters, the authors redefine what it means to conduct anthropological research ethically in a discipline that is now less isolated from allied fields in the physical and behavioral sciences and coming to terms with the global changes that affect its practice. Fluehr-Lobban provides an overview of issues from the past 110 years, drawing attention to the need for maintaining the ethical core of the discipline and a code of professional responsibility. The contributors describe a series of crises in the discipline involving clandestine research and other questionable actions by anthropologists, including secret research and intelligence work by academics; the ethical problems of medical work among native people; the evolution of cyber-ethics; and the changing relationships between indigenous people, archaeologists and museums as a result of the 1990 NAGPRA repatriation legislation. The book offers an excellent model for integrating ethics education at all levels of instruction and for empowering and engaging communities. It will be a valuable tool for anthropological researchers, instructors and fieldworkers as they transform their professional practice.

Contemporary Obstetrics and Gynecology for Developing Countries Friday Okonofua 2021-08-05 This book is a comprehensive and easy-to-read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally, they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost-effective, comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time, resources, and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis, treatment and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25+ chapters that cover topics such as reproductive health, gynecological cancers and research methods. The book is divided into six sections: Women's Reproductive Health; Obstetrics; Medical and Surgical Disorders in Pregnancy; General Gynecology; Gynecological Malignancies; Health Systems Organization, Research Methodology and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments, and adapted to the cultural and social context of developing countries, with particular in depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach, starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners of obstetrics and gynecology, midwives, general practitioners, and pediatricians, particularly those working in developing companies.

Getting to Know Waiwai Alan Tormaid Campbell 1995 Living with the Wayapi, and their charismatic leader Waiwai, is a serious adventure. It is demanding, and can turn dangerous in a moment. The environment is a difficult one, but beautiful and baffling in its richness. And the job of learning about the people is like a journey without end. Alan Campbell tells the story of these people, and of the time he spent with them, in an imaginative, beautifully written account which looks back from a century into the future to relate a way of life that is being destroyed. In doing so, he addresses important and complex issues in current anthropological theory in a way which makes them accessible without sacrificing any of their subtlety.

Indigenous Amazonia, Regional Development and Territorial Dynamics Walter Leal Filho 2020-08-04 This book brings together a valuable collection of case studies and conceptual approaches that outline the present state of Amazonia in the 21st century. The many problems are described and the benefits, as well as the achievements of regional development are also discussed. The book focuses on three themes for discussion and recommendations: indigenous peoples, their home (the forest), and the way(s) to protect and sustain their natural home (biodiversity conservation). Using these three themes this volume offers a comprehensive critical review of the facts that have been the reality of Amazonia and fills a gap in the literature. The book will appeal to scholars, professors and practitioners. An outstanding group of experienced researchers and individuals with detailed knowledge of the proposed themes have produced chapters on an array of inter-related issues to demonstrate the current situation and future prospects of Amazonia. Issues investigated and debated include: territorial management; indigenous territoriality and land demarcation; ethnodevelopment; indigenous higher education and capacity building; natural resource appropriation; food security and traditional knowledge; megadevelopmental projects; indigenous acculturation; modernization of Amazonia and its regional integration; anthropogenic interventions; protected areas and conservation; political ecology; postcolonial issues, and the sustainability of Amazonia.

Tourism and Responsibility Martin Mowforth 2008 The authors believe that tourism can only be adequately assessed through a consideration of how it fits into the structure of power. It is also argued that tourism cannot be analyzed without a consideration of its impacts on and links with development. This relationship between tourism, responsibility, power and development is explored in chapters covering both the macro and the micro level of responsibility. The authors look at methods of practising tourism responsibly or irresponsibly at the personal, company, national and international levels. The questions and dilemmas of "placing" responsibility in the tourism industry are examined throughout.
