Adult CNS Radiation Oncology Eric L. Chang 2018-07-27 This book elucidates the radiation therapy protocols and procedures for the management of adult patients presenting with primary benign and malignant central nervous system tumors. With the development of new treatment strategies and rapid advancement of radiation technology, it is crucial for radiation oncologists to maintain and refine their knowledge and skills. Dedicated exclusively to adult CNS radiation oncology, this textbook explores CNS tumors ranging from the common to the esoteric as well as secondary cancers of metastatic origin. The first half of the book is organized anatomically: tumors of the brain, spinal cord, leptomeninges, optic pathway, ocular choroid, and skull base. The second half covers primary CNS lymphoma, rare CNS tumors, metastatic brain disease, vascular conditions of the CNS, radiation-associated complications, and radiation modalities. Each chapter provides guidance on treatment field design, target delineation, and normal critical structure tolerance constraints in the context of the disease being treated. Learning objectives, case studies, and Maintenance of Certification Self-Assessment Continuing Medical Education-style questions and answers are incorporated throughout the book. This is an ideal guide for radiation oncologists, residents, and fellows, but medical students may also find value in the text.

100 Things Every Mac User Should Know (Macworld Superguides) We all like to think we're pretty savvy when it comes to using our Macs. In the case of the typical Macworld reader, that's usually true. (You're all unusually handsome and have wonderful singing voices too.) But there's a funny thing we've noticed when we talk to Mac users, even the supposedly savvy ones: There's often some essential information — basic things that would make their Mac use easier or more efficient — that they've either forgotten or never learned. So we got some Macworld editors and contributors together and asked ourselves: What are the things that every Mac user should know how to do? We didn't meant the really basic stuff -Command-C, Command-V, and so on - but the skills and knowledge that mark you as Mac-literate. And we came up with a list of 100 things that seemed to fit that bill. They range from customizing your Mac's boot-up sequence to shutting down unresponsive apps. In between, they cover Finder navigation, launching apps, keyboard shortcuts, Spotlight, PDFs, user accounts, and much, much more. (Our one rule: None of these things could require third-party tools; we're talking only about stuff you can do with OS X itself.)

Type on Screen Ellen Lupton 2014-08-12 The long awaited follow-up to our all-time bestseller Thinking with Type is here. Type on Screen is the definitive guide to using classic typographic concepts of form and structure to make dynamic compositions for screen-based applications. Covering a broad range of technologies—from electronic publications and websites to videos and

mobile devices—this hands-on primer presents the latest information available to help designers make critical creative decisions, including how to choose typefaces for the screen, how to style beautiful, functional text and navigation, how to apply principles of animation to text, and how to generate new forms and experiences with code-based operations. Type on Screen is an essential design tool for anyone seeking clear and focused guidance about typography for the digital age.

Under the Banner of Heaven Jon Krakauer 2004-06-08 NATIONAL BESTSELLER • From the author of *Into the Wild* and *Into Thin Air*, this extraordinary work of investigative journalism takes readers inside America's isolated Mormon Fundamentalist communities. Defying both civil authorities and the Mormon establishment in Salt Lake City, the renegade leaders of these Taliban-like theocracies are zealots who answer only to God; some 40,000 people still practice polygamy in these communities. At the core of Krakauer's book are brothers Ron and Dan Lafferty, who insist they received a commandment from God to kill a blameless woman and her baby girl. Beginning with a meticulously researched account of this appalling double murder, Krakauer constructs a multi-layered, bone-chilling narrative of messianic delusion, polygamy, savage violence, and unyielding faith. Along the way he uncovers a shadowy offshoot of America's fastest growing religion, and raises provocative questions about the nature of religious belief.

Project Management Casebook 2016-03-01 Each of the cases provides new and unique challenges that have been mastered by the practice of project management. Readers will be able to apply the knowledge learned from this casebook in their work. The cases enable readers to see how and why projects are used in a wide variety of organizational settings in contemporary life. Readers are exposed to both successful and not-so-successful project management practices. The case-study approach encourages reader participation and active learning, and provides the opportunity to learn something of the real world of project management. It is essential in the curricula of project management training for both undergraduate and graduate students, as well as for continuing education, consulting, and in-house company training programs. The cases were chosen for their importance in discussing the fundamentals of project management. Most contain descriptions of actual projects, and each is followed by a series of questions to guide readers' analysis of the article to maximize the learning process.

Playing the Whore Melissa Gira Grant 2014-03-11 Recent years have seen a panic over "online red-light districts," which supposedly seduce vulnerable young women into a life of degradation, and New York Times columnist Nicholas Kristof's live tweeting of a Cambodian brothel raid. But rarely do these fearful, salacious dispatches come from sex workers themselves, and rarely do they deviate from the position that sex workers must be rescued from their condition, and the industry simply abolished — a position common among feminists and conservatives alike. In *Playing the Whore*, journalist Melissa Gira Grant turns these pieties on their head, arguing for an overhaul in the way we think about sex work. Based on ten years of writing and reporting on the sex trade, and grounded in her experience as an organizer, advocate, and former sex worker, *Playing the Whore* dismantles pervasive myths about sex work, criticizes both conditions within the sex industry and its criminalization, and argues that separating sex work from the "legitimate" economy only harms those who perform sexual labor. In *Playing the Whore*, sex workers' demands, too long relegated to the margins, take center stage: sex work is work, and sex workers' rights are human rights.

Monet George T. M. Shackelford 2016-11-15 The first comprehensive examination of the painter's formative years, tracing the evolution of Monet's early style and personal ambitions that drove the rest of his career. This elegant volume is the first to be devoted to the young genius of Claude Monet (1840-1926). Bringing together the greatest paintings from his early career including his first Salon-exhibited work, the Kimbell Art Museum's "La Pointe de la Heve at Low Tide"; "Dejeuner sur l'Herbe (Luncheon on the Grass)" and "The Magpie "from the Musee d'Orsay; and "The Green Wave"" and "La Grenouillere "from the Metropolitan Museum of Art it features essays by distinguished scholars, focusing on the evolution of Monet's own distinctive mode of painting. Through the 1860s, the young painter absorbed and transformed a variety of influences, from the lessons of the Barbizon school and his mentor Boudin to the challenges posed by his friends Manet, Pissarro, Renoir, and Sisley. Artistic innovation and personal ambition shaped the work of the celebrated impressionist painter from the very start of his long and illustrious career."

Exemplars of Assessment in Higher Education Jane Marie Souza 2021-06-09 Co-published with 

src="https://styluspub.presswarehouse.com/uploads/945e3a6c54be93d0016066ab9d6c4516ceb501ac.jpg" "While assessment may feel to constituents like an activity of accountability simply for accreditors, it is most appropriate to approach assessment as an activity of accountability for students. Assessment results that improve institutional effectiveness, heighten student learning, and better align resources serve to make institutions stronger for the benefit of their students, and those results also serve the institution or program well during the holistic evaluation required through accreditation." – from the foreword by Heather Perfetti, President of the Middle States Commission on Higher Education. Colleges and universities struggle to understand precisely what is being asked for by accreditors, and this book answers that question by sharing examples of success reported by schools specifically recommended by accreditors. This compendium gathers examples of assessment practice in twenty-four higher education institutions: twenty-three in the U.S. and one in Australia. All institutions represented in this book were suggested by their accreditor as having an effective assessment approach in one or more of the following assessment focused areas: assessment in the disciplines, co-curricular, course/program/institutional assessment, equity and inclusion, general education, online learning, program review, scholarship of teaching and learning, student learning, or technology. These examples recommended by accrediting agencies makes this a unique contribution to the assessment literature. The book is organized in four parts. Part One is focused on student learning and assessment and includes ten chapters. The primary focus for Part Two is student learning assessment from a disciplinary perspective and includes four chapters. Part Three has a faculty engagement and assessment focus, and Part Four includes four chapters on institutional effectiveness and assessment, with a focus on strategic planning. This book is a publication of the Association for the Assessment of Learning in Higher Education (AALHE), an organization of practitioners interested in using effective assessment practice to document and improve student learning.

Modelling and Control of Mini-Flying Machines Pedro Castillo Garcia 2006-03-30 *Modelling and Control of Mini-Flying Machines* is an exposition of models developed to assist in the motion control of various types of mini-aircraft: • Planar Vertical Take-off and Landing aircraft; • helicopters; • quadrotor mini-rotorcraft; • other fixed-wing aircraft; • blimps. For each of these it propounds: • detailed models derived from Euler-Lagrange methods; • appropriate nonlinear

control strategies and convergence properties; • real-time experimental comparisons of the performance of control algorithms; • review of the principal sensors, on-board electronics, real-time architecture and communications systems for mini-flying machine control, including discussion of their performance; • detailed explanation of the use of the Kalman filter to flying machine localization. To researchers and students in nonlinear control and its applications *Modelling and Control of Mini-Flying Machines* provides valuable insights to the application of real-time nonlinear techniques in an always challenging area.

Counseling Clients with HIV Disease Mary Ann Hoffman 1996-02-16 Counseling interventions are a proven and powerful way to help individuals with HIV cope with the enormous changes in their lives wrought by the disease. Proposing an innovative conceptual model for HIV clinical work, this book integrates empirical research on the psychosocial aspects of HIV with extensive case material. It provides a framework for assessing clients' psychosocial concerns and implementing interventions to facilitate adjustment; reviews medical and neurocognitive aspects of HIV disease progression; explores the psychotherapeutic context of HIV clinical work; and addresses risk reduction and prevention.

Mamluk Art Abdullah Abdel Hamid El-Attar 2010-07-19 Mamluk Art: The Splendour and Magic of the Sultans tells the story of almost three centuries of political security and economic stability achieved by the sultans' successful defence against Mongol and Crusader threats. The intellectual, scientific and artistic currents that flourished then are manifest in Mamluk architecture and decorative arts, almost modern in their elegant and lively simplicity, bearing witness to the vitality of Mamluk trade, to their cultural exuberance and to their military and religious strength. Eight itineraries invite you to discover 51 museums, monuments and sites in Cairo, Alexandria and the Nile Delta.

Political Philosophy Steven M. Cahn 2011 Bold=New to this edition Now greatly expanded in its second edition, *Political Philosophy: The Essential Texts* is ideal for survey courses in social and political philosophy. Offering coverage from antiquity to the present, this historically organized collection presents the most significant works from nearly 2,500 years of political philosophy. It moves from classical thought (Plato, Aristotle) through the medieval period (Augustine, Aquinas) to modern perspectives (Machiavelli, Hobbes, Locke, Rousseau, Hume, Smith, Hamilton and Madison, Kant). The book includes work from major nineteenth-century thinkers (Hegel, Marx and Engels, Mill) and twentieth-century theorists (Rawls, Nozick, Charles Taylor, Foucault, Habermas, Virginia Held) and also presents a variety of notable documents and addresses, including The Declaration of Independence, The Constitution of the United States, The Declaration of the Rights of Man and of the Citizen, The Universal Declaration of Human Rights, and speeches by Pericles, Edmund Burke, Abraham Lincoln, Elizabeth Cady Stanton, and Martin Luther King, Jr. The readings are substantial or complete texts, not fragments. In addition to the new selections noted above in

bold, the second edition also includes more essays from Aristotle, Locke, Hume, Smith, Hamilton and Madison, Kant, and Mill. An especially valuable feature of this volume is that the works of each author are introduced with an engaging essay by a leading contemporary authority. These introductions include Richard Kraut on Plato and Aristotle; Paul J. Weithman on Augustine and Aquinas; Roger D. Masters on Machiavelli; Jean Hampton on Hobbes; A. John Simmons on Locke; Joshua Cohen on Rousseau and Rawls; Donald W. Livingston on Hume; Charles L. Griswold, Jr., on Smith; Bernard E. Brown on Hamilton and Madison; Paul Guyer on Kant; Steven B. Smith on Hegel; Richard Miller on Marx and Engels; Jeremy Waldron on Mill; Thomas Christiano on Nozick; Robert B. Talisse on Taylor; Thomas A. McCarthy on Foucault and Habermas; and Cheshire Calhoun on Held.

The Stinky Cheese Man and Other Fairly Stupid Tales Jon Scieszka 2004-05 The stories in this book are almost Fairy Tales. But not quite. They are Fairly Stupid Tales. What else would you call a story like Goldilocks and the Three Elephants? In this hilarious retelling of familiar tales, Jon Scieszka also includes the story of Chicken Licken, The Really Ugly Duckling, The Tortoise and the Hair, Cinderumpelstiltskin, Little Red Running Shorts, Jack's Bean Problem, and many more! Each story is accompanied by funny color illustrations by Lane Smith. The book warns that "Anyone caught telling these fairly stupid tales will be visited, in person, by the Stinky Cheese Man."

Promoting Biodiversity in Food Systems Taylor & Francis Group 2020-12-18 Biodiversity of the food system is crucial for food production and loss of biodiversity is a pressing issue. This book focuses on biodiversity's crucial role in food systems, health and well-being, and fate of the natural environment. It provides practical recommendations on how proper food systems can

sustain a healthier planet and protect biodiversity. Sections provide a comprehensive understanding of the urgent need for promoting biodiversity-promoting food systems that help maintain planetary boundaries that are at risk; mimic the natural processes of highly integrated ecosystems; and improve human/planetary health while providing a wholesome and sufficient food supply.

Textbook of pathology Harsh Mohan 2005

Nonlinear Oscillations Ali H. Nayfeh 2008-09-26 Nonlinear Oscillations is a self-contained and thorough treatment of the vigorous research that has occurred in nonlinear mechanics since 1970. The book begins with fundamental concepts and techniques of analysis and progresses through recent developments and provides an overview that abstracts and introduces main nonlinear phenomena. It treats systems having a single degree of freedom, introducing basic concepts and analytical methods, and extends concepts and methods to systems having degrees of freedom. Most of this material cannot be found in any other text. Nonlinear Oscillations uses simple physical examples to explain nonlinear dispersive and nondispersive waves. The notation is unified and the analysis modified to conform to discussions. Solutions are worked out in detail for numerous examples, results are plotted and explanations are couched in physical terms. The book contains an extensive bibliography.

Handbook of Research on Political Activism in the Information Age Solo, Ashu M. G. 2014-05-31 Technology, and particularly the Internet, has caused many changes in the realm of

politics. Mainstream media no longer has a monopoly on political commentary as social media, blogs, and user-generated video streaming sites have emerged as an outlet for citizens and political activists to openly voice their opinions, organize political demonstrations, and network online. The Handbook of Research on Political Activism in the Information Age includes progressive research from more than 39 international experts at universities and research institutions across 15 different countries. Each of the 25 scholarly chapter contributions focus on topics pertaining to the application of information technology, engineering, and mathematics to political activism. Through its analysis of the methods for political activism in the information age, the effectiveness of these methods, as well as emerging analytical tools, this book is designed for use by researchers, activists, political scientists, engineers, computer scientists, journalists, professors, students and professionals working in the fields of politics, e-government, media and communications, and Internet marketing.
