The Complete Guide to Using Google in Libraries Carol Smallwood 2015-02-26 Carol Smallwood's The Complete Guide to Using Google in Libraries, Volume 1: Instruction, Administration, and Staff Productivity explores how Google's suite of tools, from Google Docs (now Google Drive), Google Scholar, Hangout, Forms, and others made freely available to the Internet Community can be used by libraries to expand the role of digital operations in the management of library materials, to communicate with their patrons and collaborators, to exploit the resources on the Web, and many others. The book has 29 chapters organized into sections that focus on ways that Google's suite of tools can be applied to address problems in a specific area of library concern. The section headings are: Library Instruction for Users; Collaboration within and among libraries; Library Administration; Collection Management; and Library Productivity. In each topical area, the chapters show how librarians are taking advantage of these tools to change the way that their library works. All of this without the burden of an additional bill to pay. Through these carefully selected case studies from real libraries, you will be able to learn about the surprising and powerful potential that exists through Google tools to improve library operations.

**Office and SharePoint 2010 User's Guide** Michael Antonovich 2010-08-06 Web sites, collaboration, document management, paperless offices—we want it all in business today, but how do we achieve all of these goals? More importantly, if you work for one of the millions of small-to-medium-sized businesses, how do you find the time to build the expertise necessary to reach these goals? Even the most powerful tool will not allow you to succeed unless you can get the majority of your staff to use it efficiently and effectively. You need a guide that demonstrates a platform that small-to-medium-sized businesses can use to reach these goals. *Office and SharePoint 2010 User's Guide* demystifies the path that every Microsoft Office user can follow to benefit from the synergism of tools they are already familiar with. Together with *SharePoint 2010*, users can achieve goals like web sites with a consistent single view, improved collaboration within their organization, and better document management, and may even get one step closer to the paperless office we've been promised for years. This book has topics for Office users of all skill levels, from those just starting to use Office tools to experienced power users. It examines each major Office tool and shows how it contributes to the support and use of SharePoint in today's increasingly electronic-based office environment.

**Personalization and Collaboration in Adaptive E-Learning** Tadlaoui, Mouenis Anouar 2019-12-13 As part of e-learning, adaptive systems are more specialized and focus on the adaptation of learning content and presentation of this content. An adaptive system focuses on how knowledge is learned and pays attention to the activities, cognitive structures, and context of the learning material. The adaptive term refers to the automatic adaptation of the system to the learner. The needs of the learner are borne by the system itself. The learner did not ask to change the parameters of the system to his own needs; it is rather the needs of the learner that will be supposed by the system. The system adapts according to this necessity. Personalization and Collaboration in Adaptive E-Learning is an essential reference book that aims to describe the specific steps in designing a scenario for a collaborative learning activity in the particular context of personalization in adaptive systems and the key decisions that need to be made by the teacher-learner. By applying theoretical and practical aspects of personalization in adaptive systems and applications within education, this collection features coverage on a broad range of topics that include adaptive teaching, personalized learning, and instructional design. This book is ideally designed for instructional designers, curriculum developers, educational software developers, IT specialists, educational administrators, professionals, professors, researchers, and students seeking current research on comparative studies and the pedagogical issues of personalized and collaborative learning.

*Market Integration Through Data Protection* Mario Viola de Azevedo Cunha 2013-02-26 In the context of the continuous advance of information technologies and biomedicine, and of the creation of economic blocs, this work analyzes the role that data protection plays in the integration of markets. It puts special emphasis on financial and insurance services. Further, it identifies the differences in the data protection systems of EU member states and examines the development of common standards and principles of data protection that could help build a data protection model for Mercosur. Divided into four parts, the book starts out with a discussion of the evolution of the right to privacy, focusing on the last few decades, and taking into account the development of new technologies. The second part discusses the interaction between data protection and specific industries that serve as case studies: insurance, banking and credit reporting. The focus of this part is on generalization and discrimination, adverse selection and the processing of sensitive and genetic data. The third part of the book presents an analysis of the legislation of three EU Member States (France, Italy and UK). Specific elements of analysis that are compared are the concepts of personal and anonymous data, data protection principles, the role of the data protection authorities, the role of the data protection officer, data subjects' rights, the processing of sensitive data, the processing of genetic data and the experience of the case studies in processing data. The book concludes with the proposal of a model for data protection that could be adopted by Mercosur, taking into account the different levels of data protection that exist in its member states.
