In this important book, leadership expert Richard Daft portrays this dilemma as a struggle between instinct (elephant) and intention (the executive) using the most current research on the intentional vs. the habitual mind to explain how this phenomenon occurs. Based on current research and real-life examples Offers leaders a method for directing themselves more productively Written by an expert in leadership, organizational performance, and change management Through real-life examples and recent studies in psychology, management and Eastern spirituality Daft provides guidance to all of us who struggle finding our own balance and cultivating the behavior of others.

Leading, Growing, and Sustaining God's Church Clarence Duff Ph.D. 2021-07-13 Focusing on what facilitates effective leadership, church growth, and retention, this book sets forth a process-oriented framework for understanding the dynamics of church growth and what works for and against it. The author, who is currently serving as the senior pastor of a local church in the City of Brampton, Ontario, for more than twenty years, highlights basic concepts and practices related to church leadership and growth. He considers questions such as: Why do some churches grow in numbers while others lag? What are the dynamic processes, strategies, and pathways that underlie effective leadership, church growth, and retention? How can the answers to these questions inform endeavors to increase and retain church membership? The author also asks if it's true that God is in partnership with his leaders, why are so many of our local churches not growing but declining? The world the church was established in more than two thousand years ago is not the world we live in today. Rethink what it means to lead, grow, and retain membership in a changing world with this important book.

Instead of starting with concepts and moving to application, this text starts with application, an introductory problem or challenge that encourages you to first empty out your ideas so you are ready to understand new ideas and acquire new skills. Each chapter provides a menu of resources for engagement, application, and learning, everything you need to develop the spot-on management skills you'll need to be a successful manager. This new learning philosophy leads you through a seven-step learning process: 1. Manager Challenge, 2. Initial Response, 3. Discover Yourself, 4. Discover Knowledge, 5. Action Learning Exercises, 6. Test Your Mettle, and 7. Personal Skills Log. Shorter, highly-focused chapters take you through each of these seven steps, allowing you to capture the essence and critical points for each topic. The mass of research material has been condensed and focused into discrete learning packages (chapters) designed specifically for engagement. BUILDING MANAGEMENT SKILLS offers a unique new set of Challenge Videos that are specifically designed to help develop your decision-making and thinking skills. After you watch the video challenge you are asked to respond to the challenge by solving the problem, helping you see the relevance of the chapter material and answering the question Why do I need to know this material?.
