Multimedia Signals and Systems Mrinal Kr. Mandal 2012-12-06

Multimedia Signals and Systems is primarily a technical introductory level multimedia textbook, including problems, examples, and MATLAB® codes. It will be a stepping-stone for readers who want to research in audio processing, image and video processing, and data compression. This book will also be useful to readers who are carrying out research and development in systems areas such as television engineering and storage media. Anyone who seeks to learn the core multimedia signal processing techniques and systems will need Multimedia Signals and Systems. There are many chapters that are generic in nature and provide key concepts of multimedia systems to technical as well as non-technical persons. There are also several chapters that provide a mathematical/analytical framework for basic multimedia signal processing. The readers are expected to have some prior knowledge about discrete signals and systems, such as Fourier transform and digital filters. However, a brief review of these theories is provided. Additional material for this book, including several MATLAB® codes along with a few test data samples; e.g., audio, image and video may be downloaded from <http://extras.springer.com>.

Ladder Logic Programming Fundamentals A. J. WRIGHT 2019-09-05

This book, "Ladder Logic Programming Fundamentals" is the second edition of the book and is updated with more useful information on the latest Allen Bradley PLCs. It teaches you step by step the fundamentals of ladder logic diagrams, their basics and variables, including how ladder logic diagrams can be derived from traditional schematic circuit diagrams, and the general rules governing their use. Ladder logic is the primary programming language for Programmable Logic Controlers (PLCs). It has following advantages: It is the primary language used in industrial applications, especially for programming PLCs. It is a graphical and visual language, unlike textual high-level languages, such as C, C++, Java and so on. It can be derived from traditional schematic diagrams which can be cumbersome for complicated circuits (for example, relay logic diagrams). It makes use of primitive logic operations like AND, OR and NOT. It can be used where the primary reasons are safety, ease and isolation. For example, for electrical isolation of high-power industrial motors. It has a control behavior. For example, it can be used to control motors, transformers, contactor coils and overload relays in an electrical control system, for example, to make a light bulb come on when either switch A is ON (closed) or when switch B is ON (closed). In this edition, I explore the Allen-Bradley controllers in chapters where PLCs are treated in great details. The Studio 5000 software discussed in this book includes the Logix Designer application for the programming and configuration of Allen-Bradley ControlLogix 5570 and CompactLogix 5370 programmable automation controllers. I also give you the link to download a 90 day trial version of the RSLogix 5000 software which you can use to learn how to program Logix5000 controllers. Logix Designer will continue to be the package you use to program Logix5000 controllers for discrete, process, batch, motion, safety, and drive-based systems. Logix Designer offers an easy-to-use, IEC61131-3 compliant interface, symbolic programming with structures and arrays and a comprehensive instruction set that serves many types of applications. It provides ladder logic, structured text, function block diagram and sequential function chart editors for program development as well as support for the S88 equipment phase state model for batch and machine control applications.

The History and Future of Technology Robert U. Ayres 2021 Eminent physicist and economist, Robert Ayres, examines the history of technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus Homo, language evolved in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn coal instead of firewood, in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

Trevor Paglen 2010-10-25 Updated with New Information and Additional Patches They're on the shoulders of all military personnel: patches showing what a soldier's unit does. But what if that's top secret? "A glimpse of [the Pentagon's] dark world through a revealing lens—patches—the kind worn on military uniforms. . . The book offers not only clues into the nature of the secret programs, but also a glimpse of zealous male bonding among the presumed elite of the military-industrial complex. The patches often feel like fraternity pranks gone ballistic." —William Broad, The New York Times I COULD TELL YOU. . . is a bestselling collection of more than seventy military patches representing secret government projects. Here author/photographer/investigator Trevor Paglen explores classified weapons projects and intelligence operations by scrutinizing their own imagery and jargon, disclosing new facts about important military units, which are here known by peculiar names ("Goat Suckers," "Grim Reapers," "Tastes Like Chicken") and illustrated with occult symbols and ridiculous cartoons. The precisely photographed patches—worn by military personnel working on classified missions, such as those at the legendary Area 51—reveal much about a strange and eerie world about which little was previously known. "A fresh approach to secret government." —Steven Aftergood, The Federation of American Scientists "An impressive collection." —Justin Rood, ABC News "A fascinating set of shoulder patches." —Stephen Colbert, The Colbert Report "I was fascinated... [Paglen] has assembled about 40 colorful patch insignia from secret, military 'black' programs that are hardly ever discussed in public. He has plenty of regalia from the real denizens of Area 51." —Alex Beam, The Boston Globe

Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.
