Venus in India Charles Devereaux 2021-11-16 Venus in India (1889) is an erotic novel by Charles Devereaux. Published pseudonymously, the novel is styled as the autobiography of its fictional author, a young British Cavalry officer whose deployment in India is filled with romantic escapades. "The war in Afghanistan appeared to be coming to a close when I received sudden orders to proceed, at once, from England to join the First Battalion of my regiment, which was then serving there. I had just been promoted Captain and had been married about eighteen months." Sent to India on a last minute military assignment, Captain Devereaux takes his time arriving at his final destination on the North West Frontier. Along the way, he stops in Nowshera and Cherat, where he wastes no time romancing the wives and daughters of his fellow soldiers. First with the lovely Lizzie Wilson, and then with the daughters of Colonel Selwyn, Charles Devereaux gives himself over to passion and desire, forgetting about his wife and young child at home. Graphic and graceful, comic and provocative, Venus in India is a shining example of nineteenth century erotica in which the power of words to arouse is on full display. With a beautifully designed cover and professionally typeset manuscript, this edition of Charles Devereaux's Venus in India is a classic of Victorian erotica reimaged for modern readers.

Thoughtreal Michael Gryboski 2018-09-02 For Washington, DC Police Detective Brittany Johnson, this was no ordinary triple homicide. It had political implications: the three victims belonged to a diaspora community dealing with increased tension from another ethnic community based in the melting pot of the Nation's Capital. Yet this case was not merely political, but strange. The three dead men were armed and forensics showed that they fired several rounds at their attacker. How did they miss? What exactly killed them? As Johnson digs deeper, she will encounter both the very pinnacle of existential fear and the summit of passionate, unconditional love.

The Year of Faith Mitch Pacwa 2012-08-15 Our society is struggling with what Pope Benedict has called "profound crisis of faith that has affected many people." In response, the Holy Father has called us all to a Year of Faith from October 2012 to November 2013. We see the signs all around us: the demand for science to prove everything before we can believe it, the role of media and celebrities who deny the existence of God and denounce the role of the Church, and the ease in which we can all isolate God and faith into only one part of our life. In a follow-up to his best selling St. Paul Bible Study for Catholics during the year of St. Paul, Fr. Mitch Pacwa once again leads Catholics to a deeper understanding of Pope Benedict's call to action for the year. Perfect for individual or group study, this book is a wonderful guide to experiencing a conversion, growing in faith, and following Jesus Christ more closely. It shows us how to integrate every component of our life - relationships, morality, work, recreation, and all - into a meaningful whole. Make the most of Pope Benedict's Year of Faith, walking hand in hand with Fr. Pacwa as he guides you through the beauty and insights of Scripture in relationship to your everyday life.

The Sun: A Laboratory for Astrophysics J.T. Schmelz 1992-07-31 As in the days following Skylab, solar physics came to the end of an era when the Solar Maximum Mission re-entered the earth's atmosphere in December 1989. The 1980s had been a pioneering decade not only in space- and ground-based studies of the solar atmosphere (Solar Maximum Mission, Hinotori, VLA, Big Bear, Nancay, etc.) but also in solar-terrestrial relations (ISEE, AMPTE), and solar interior neutrino and helioseismology studies. The pace of development in related areas of theory (nuclear, atomic, MHD, beam-plasma) has been equally impressive. All of these raised tantalizing further questions about the structure and dynamics of the Sun as the

prototypical and best observed star. This Advanced Study Institute was timed at a pivotal point between that decade and the realisation of Yohkoh, Ulysses, SOHO, GRANAT, Coronas, and new ground-based optical facilities such as LEST and GONG, so as to teach and inspire the up and coming young solar researchers of the 1990s. The topics, lecturers, and students were all chosen with this goal in mind, and the result seems to have been highly successful by all reports.
